# Dear Shareholders,

To put it informally, business is buzzing. Although this language may not be everyone's cup of tea. these three words do encapsulate the development of our business in the last quarter: From July to September, our revenue increased by 10.3 percent to € 15.2 million. Looking back, we have never before in this decade had such high turnover with high-tech hoses and connector systems in a single quarter. Happily, this means that our business became increasingly lively in 2013 after a weak start. Today, we can report revenue growth of 5.1 percent year-on-year on the basis of nine months of 2013. Our activities in Asia and America made an important contribution to this growth. Our internationalisation strategy is taking effect.

Dr. Andreas Bastin, Chief Executive Officer

Speaking of internationalisation, the first stage of the establishment of our sales organisations in China and Singapore is now complete. This can be seen in the staff cost ratio, which has passed its peak and declined slightly to 37.2 percent for the first time since our expansion into Asia began in 2011. Now our task is to bring all processes into an optimum steady state. At that time our EBIT margin (currently 10.5 percent) will again move towards our long-term profitability goal of 13 to 14 percent. My colleague Mark Becks and I can assure you that as the Executive Board as well as shareholders, we have a great interest in this happening sooner rather than later!

Our business model and our strategy are correct. We are growing, and doing so internationally above all. As technology leader for high-tech hoses, our expertise in materials and processing methods enables us to regularly launch new products that can meet our customers' demands. A recent example is the Master-PUR Perfomance\*, which we brought into the market in early September.

This remarkable product that took years to develop due to the technical sophistication of the production process is the result of our customers requesting a hose that is seamless smooth on the inside as well as a cavity-free surface and has a high abrasion life. After the market launch in September this year, we are now eagerly awaiting our customers' evaluation based on current field tests. The initial responses have been extremely promising. Since our business is generally associated with smaller revenue volumes per order, the success of this world first product will only gradually make its presence felt in our revenue account – a typical characteristic of business with high-tech hoses.

So today, after three quarters of 2013, I can sum up our progress with a metaphor: We are on an exciting world voyage with the destination of becoming the global market leader in all specialist markets for connector systems in the medium term. We are going in the right direction. Now we need to hold course and not slacken the pace of our efforts, so that we arrive at our destination in the near future with solid, sustainable income. Accompany us on our voyage, dear shareholders!

Gelsenkirchen, 4 November 2013

Dr. Andreas Bastin

1 hr Idudeas Jastin

Chief Executive Officer

# **Interim Management Report**

#### **Group structure and business activities**

The Masterflex Group, with its parent company Masterflex SE, Gelsenkirchen (referred to below as Masterflex Group or Masterflex), is a supplier of high-tech hoses and connector systems. The internationally active group with its roots in Germany is a specialist in the development and manufacture of high-quality connector systems made from high-tech plastics and fabrics.

The main production sites of the international Masterflex Group with 13 operating subsidiaries are Gelsenkirchen, Halberstadt, Norderstedt and Houston (USA). In addition, Masterflex has different locations in Europe, America and Asia through our subsidiary branches or sales partners.

Masterflex shares have been traded on the Frankfurt Stock Exchange since 2000.

# Market and competition

The global market for high-tech hoses and connector systems comprises many rather regionally oriented specialist markets, which are mostly served by SMEs. Customers come primarily from the manufacturing sector including industrial applications (B2B market). Due to the scarcity of expertise in production, processing and application of the demanding polymers and many diverse fields of use, it is a promising market worldwide.

Our regional markets around the world are subject to quite different economic influences. While our future markets in America and Asia continue to grow dynamically, economic development in Europe remains subdued.

Masterflex's internationalisation strategy is suited to this continental divergence, in that it successively spreads the traditional sales focus of the Masterflex Group to several continents

#### 8

#### Business development in the first nine months of 2013

Economically, 2013 kept growing stronger after a not-so-easy start. This general trend is not the case in every market we serve but is reflected in our revenue: After a decline in the first quarter (-1.2 percent) and a much better second quarter (+ 6.4 percent), consolidated revenue was again much livelier in the third quarter at + 10.3 percent. Overall, consolidated revenue increased by 5.1 percent over the first nine months compared to the same period of the previous year.

Our efforts for a widespread customer base, consistent innovation policy and the acceleration of our internationalisation are showing fruit.

Since March 2013, we have served our customers worldwide under a uniform brand identity. We offer all products under the operating brands Masterflex, Matzen & Timm, Novoplast Schlauchtechnik, Fleima-Plastic and Masterduct under the umbrella brand Masterflex Group. Our performance promise to our customers is succinctly encapsulated by the slogan Connecting Values: We offer more than hoses – also competent advice with universal solutions from the technology leader. As well as the corporate design, our internet presence is also being incrementally adapted: The Masterflex Group and all its locations can be found at www.MasterflexGroup.com; moreover, the brands Masterflex (www.masterflex.de) and Novoplast Schlauchtechnik (www.schlauchtechnik.de) are now also online with their new presence.

#### Internationalisation

Since the beginning of 2013, we have been operating at full speed at our new location in Kunshan in Shanghai, China. In addition, a network of dealers in other Asian regions is being established from the Singapore location. There is great interest in Asia in our high-tech hoses "designed in Germany"; this is reflected in the incoming orders and generated revenue. Our very first customers do not just include – as planned – international customers, but also, happily, local businesses. In the USA, too, the Masterflex Group is growing faster than the rest of the Group – a nice result for our internationalisation strategy.

#### Innovation

In September, we launched our world first, our self-developed Master-PUR Performance® hose, with a marketing campaign. This innovative Masterflex-brand hose has a seamless smooth and cavity-free surface and can nevertheless resist the greatest stresses when transporting abrasive or heavy bulk material. In addition, it is much more flexible than comparatively heavy PU hoses. The Master-PUR Performance® is the only spiral hose in the world that offers these otherwise contradictory properties in a single product. The first market reactions to this new hose with real added value for the user have been very positive.

Further connecting products are currently being developed. Our next product innovation will be launched early in 2014.

#### 10

# Results of operations, net assets and financial position

#### **Results of operations**

In the first nine months of 2013, consolidated revenue grew by 5.1 percent on the same period of the previous year to  $\in$  44.2 million. In the third quarter of 2013 alone, revenue grew by 10.3 percent to  $\in$  15.2 million (previous year:  $\in$  13.8 million).

At € 44.9 million, gross revenue was 4.0 percent above that of the previous year (€ 43.1 million).

The Group's earnings before interest, taxes, depreciation and amortisation (EBITDA) in the first three quarters fell from  $\in$  7.9 million in the same period of the previous year to  $\in$  6.6 million (–16.4 percent). This is because of the start-up costs of internationalisation, which are primarily reflected in staff costs.

At € 16.5 million, staff costs were 10.4 percent higher than in the previous year (€ 15.0 million). The staff cost ratio is 37.2 percent (ratio of staff costs to revenue plus the change in inventories). Compared to the previous year (35.6 percent), this planned increase reflects the substantial expansion of the sales and production workforce at the turn of 2012/2013. The internationalisation is now centred on process optimisation rather than personnel growth; for this reason, the staff cost ratio did not increase quarteron-quarter for the first time in Q3 (Q2/2013: 37.7 percent), but instead declined slightly.

In the first nine months of the year, the cost of materials amounted to  $\in$  13.8 million; this is an increase of 4.8 percent compared to the same period of the previous year ( $\in$  13.1 million). The cost of materials ratio amounted to 31.0 percent (Q3/2012: 31.2 percent). Other operating expenses amounted to  $\in$  8.0 million; due to increased energy and freight costs, this equates to 11.7 percent more than the same period of the previous year ( $\in$  7.2 million).

Depreciation and amortisation of intangible assets and property, plant and equipment in the first three quarters of 2013 was  $\leqslant$  1.9 million, nearly identical to the previous year ( $\leqslant$  1.9 million).

The Group's operating result (EBIT) amounted to  $\leqslant$  4.7 million. This is a decline of –21.2 percent against the same period of the previous year ( $\leqslant$  5.9 million). This results in an EBIT margin of 10.5 percent (previous year: 14.1 percent). This planned temporary decline in the margin is our investment in the future: Against the backdrop of our strategic goals, there is no way around further internationalisation with a global diversification of revenue.

The financial result amounted to € -1.1 million (previous year: € -1.0 million). The increase over the previous year is essentially due to one-off items: by returning the State guarantee for the purposes of the new syndicated loan in summer 2013, annual costs only had to be allocated in the first half year. Next year, we expect a reduction in the interest charges and thus also in the financial result while EURIBOR interest rates remain low.

Consolidated net profit is  $\leqslant$  2.1 million (previous year period:  $\leqslant$  2.7 million). This equates to earnings per share of  $\leqslant$  0.24 compared with  $\leqslant$  0.31 per share in the first nine months of 2012.

#### Net assets

On the balance sheet date of 30 September 2013, total assets had increased by 5.8 percent from  $\leqslant$  52.4 million to  $\leqslant$  55.5 million.

Non-current assets remained virtually unchanged at € 32.0 million (€ 31.8 million). Slight movements occurred in property, plant and equipment (+ 2.4 percent) to now € 21.7 million, while deferred tax assets decreased by 7.2 percent to € 5.5 million due to the positive financial position.

Current assets increased by 14.1 percent to € 23.5 million as of the reporting date. This is primarily attributable to the growth-related increase of trade receivables (+ 23.4 percent) to € 6.7 million (previous year: € 5.5 million) and the increased cash in hand and bank balances (+ 47.0 percent) now at € 4.1 million due to the new syndicated loan.

#### Financial position

Equity has grown by 9.3 percent from € 20.5 million to the current figure of € 22.4 million due to the net income achieved. This gives an equity ratio of 40.4 percent.

Long-term borrowings have increased by 11.0 percent to € 21.8 million. This figure reflects the new syndicated loan in effect since June 2013, in which mainly all current bank liabilities of the Masterflex Group are now pooled into a long-term amortisable loan.

Current liabilities fell 6.6 percent from € 11.8 million to € 11.0 million. This decline follows in particular from the declining financial liabilities now amounting to € 4.7 million (end of 2012: € 6.1 million) in relation to the syndicated loan in effect since June. Provisions climbed 13.2 percent from € 2.6 million (end of 2012) to € 2.9 million.

#### **Staff report**

As part of its growth strategy, Masterflex has expanded its workforce. In the first nine months of 2013, the number of employees employed in the Masterflex Group averaged 529. Compared to the same period of the previous year, this is a 6.4 percent increase.

Almost all sites have invested in new staff. This primarily involved sales in the context of internationalisation as well as production-related expansion.

## **Research and development**

In September, the new Masterflex-brand Master-PUR Performance® was presented to the market. This innovation is particularly well suited to transporting bulk material.

Other R&D projects are being developed and tested. As of 30 September 2013, there were no material changes compared with the statements included in the 2012 consolidated management report.

#### Report on post balance sheet date events

No events of particular significance relating to the results of operations, net assets and financial position took place after the balance sheet date.

#### **Opportunities and risk report**

There have been no changes to the opportunities and risk situation as presented in the 2012 consolidated report.

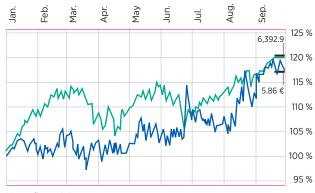

#### Outlook

Economic development seems to be improving further. This applies not only to the domestic economy in Germany, but also to our international markets. This is particularly the case in the other regions of the world in which Masterflex is increasingly active. In Asia and North America, we expect further economic growth.

The Masterflex Group is continuing its long-term growth strategy in a consistent manner, which is based on key components of further internationalisation, on product innovation and acquisitions in the hose market and on a series of internal measures for optimising the business model. This includes successively implementing our unified brand identity, increased benchmarking for Group-wide implementation of success strategies as well as systematically optimising various internal processes and structures.

For 2013 we expect a significant increase in revenue, above that of 2012, depending on the progress made in the implementation of our internationalisation measures. Our operating result will follow the sales growth at a more moderate pace, whereby the nadir should be reached sometime in this quarter. Given the start-up costs for further internationalisation, which in the main were recorded immediately in the financial statements, we continue to expect a clear two-digit EBIT margin for 2013.

# The Masterflex Share

Masterflex S-DAX

Based on the daily closing prices, the Masterflex share price has moved mainly sideways since the start of the year until the beginning of May 2013 with prices ranging from & 4.95 to & 5.10. Then from mid-May, subsequent to publication of the first quarter results, the share price began to climb clearly to a level around & 5.20 with some lively trading at times. This trend continued after the AGM in June and intensified following the publication of the half-year report on 11 August: The share price rose significantly and closed the third quarter of 2013 at & 5.86. The positive sentiment was retained in October and gave impetus for quotations of around & 6.

In the first nine months of 2013, the share fluctuated between a low of  $\leqslant$  4.85 (22 March 2013) and a high of  $\leqslant$  5.94 (20 to 23 and 27 September 2013).

Liquidity of the shares has improved noticeably over the course of 2013. In the first quarter, around 454,000 shares were traded on Xetra and on the floor. This then increased to around 524,000 (Q2/2013) and then to a good 582,000 shares most recently (Q3). This means that an average of well over 8,100 shares was traded every trading day in the first nine months of the year, although the liquidity has not yet fully recovered to that of the previous year (9,200 shares per trading day). The expansion of the circle of sponsors also contributed to the

revival in trading: As well as Close Brother Seydler Bank, WGZ Bank is now also Designated Sponsor for our share.

In September 2013, Masterflex attended a road show with Luxembourg investors who were very interested in the share.

# **Notes Quarterly financial report** 3/2013

#### 1. Reporting principles

This interim report was prepared in accordance with the International Financial Reporting Standards (IFRS), as applicable in the EU, and International Accounting Standards (IAS) of the International Accounting Standard Board (IASB) and is in keeping with the company's key accounting principles presented here. The same accounting principles were applied as in the consolidated financial statements for the financial year that ended on 31 December 2012.

#### 2. Basis of consolidation

The basis of consolidation has not changed in comparison with 31 December 2012.

#### 3. Dividend

Masterflex SE did not pay a dividend for the financial year 2012.

#### 4. Financial liabilities

The syndicated loan agreement, which was concluded in June has a total volume of € 40.0 million and a maturity date of May 2018. The drawdown of the loan amounted to € 24.5 million on the balance sheet date.

The syndicated loan agreement was reduced in the balance sheet by the directly attributable transaction costs of € 727 thousand at initial recognition. The subsequent measurement is carried out at amortised cost according to the effective interest rate method. The difference between the disbursed amount (after deduction of transaction costs) and the redemption amount is distributed over the term at a rate consistent with the effective interest rate and recorded under net interest income.

The receivables from the bank consortium from the syndicated loan agreement are secured by the Masterflex Group companies among others by land debts registered on domestic real estate, the pledging of shares, the assignment of receivables and the transfers of ownership.

#### 5. Segment reporting

The Masterflex Group divides up its operating segments in accordance with the criteria of IFRS 8. Control is carried out on the basis of the information that the management as chief operating decision maker receives for measuring the performance of and allocating resources for the entire Masterflex Group (management approach).

The basis of segmentation has not changed in comparison with the consolidated financial statements of 31 December 2012. SURPRO Verwaltungsgesellschaft mbH, Masterflex Entwicklungs GmbH and Masterflex Vertriebs GmbH are presented on a uniform basis under "Discontinued business units". The Masterflex Group thus has one operating segment, the core High tech hose systems business unit (HTS).

Segment reporting	High tech hose sytems	Con- tinued opera- tions	Discon- tinued opera- tions	Total seg- ments
30 Sep. 2013	k€	k€	k€	k€
Revenue from non-Group third parties	44,153	44,153	0	44,153
Earnings (EBIT)	4,655	4,655	-29	4,626
Investments in property, plant and equipment and intangible assets	2,306	2,306	0	2,306
Depreciations	1,908	1,908	0	1,908
Assets	55,457	55,457	12	55,469

Segment reporting	High tech hose sytems	Con- tinued opera- tions	Discon- tinued opera- tions	Total seg- ments
30. Sep. 2012	k€	k€	k€	k€
Revenue from non-Group third parties	42,025	42,025	0	42,025
Earnings (EBIT)	5,907	5,907	-106	5,801
Investments in property, plant and equipment and intangible assets	1,755	1,755	0	1,755
Depreciations	1,947	1,947	0	1,947
Assets	51,959	51,959	17	51,976

#### 6. Earnings per share

Basic earnings per share is calculated in accordance with IAS 33 by dividing consolidated net income by the weighted average of the number of shares in circulation during reporting period. As at 30 September 2013, basic earnings per share from continued operations amounted to € 0.24 and earnings per share from continued and discontinued operations amounted also to € 0.24; both figures are based on a weighted average number of shares of 8,865,874.

Since there is no stock option plan, diluted earnings are not calculated.

#### 7. Treasury shares

As at 30 September 2013 Masterflex SE held a total of 134,126 treasury shares.

#### 8. Employees

In the reporting period, the number of employees was 529, up 6.4% on the previous year period (497 employees).

#### 9. Income tax

In the calculation of income tax expense in the quarterly financial report, the estimated effective income tax rate for the current financial year is included in the intra-year calculation of tax expense. The effective tax rate is based on current earnings and tax planning.

#### 10. Cash flow statement

The consolidated cash flow statement is prepared in accordance with IAS 7 ("Cash Flow Statements"). A distinction is made between cash flows from operating, investing and financing activities. The cash and cash equivalents reported in the cash flow statement correspond to the "cash in hand and bank balances" reported on the face of the balance sheet.

The cash and cash equivalents at the end of the period, as presented in the consolidated cash flow statement, can be reconciled to the associated items in the consolidated balance sheet as follows:

	30. Sep. 2013 k€	30. Sep. 2012 k€
Cash and cash equivalents at the end of period	4,157	2,687
Cash in hand and bank balances included in assets held for sale	8	13
Cash in hand and bank balances	4,149	2,674

## 11. Related party disclosures

Masterflex SE and the companies included in the consolidated financial statements conducted material transactions with the following related parties within the meaning of IAS 24:

MODICA Grundstücks-Vermietungsgesellschaft mbH & Co., Objekt Masterflex KG, Gelsenkirchen.

#### 30 Notes

The relationships are explained in the Notes to the Consolidated Financial Statements under note 35 in the 2012 Annual report. There have been no changes to the comments made there in the reporting period.

#### 12. Auditor's review of the quarterly financial report

The interim financial statements and the interim management report of the quarterly financial report were neither audited in accordance with section 317 of the German Commercial Code nor reviewed by an auditor.
