Notes to the Interim Report	26

Dear Shareholders,

Let me say first and foremost: we're doing ok! With a growth rate of 6.4 percent in the second quarter, we return to the growth path we have pursued in recent years. This also confirms our assumption that the setback of Q1 was mainly due to the low number of working days. Revenue totalled € 29 million in the first six months, around 2.5 percent more compared to the previous year.

Thus, as a technology leader in a speciality market segment, we were able to clearly distance ourselves from the downbeat tones being played out by the European economy. Moreover, it shows that our strategy of internationalisation is the right one and clearly leads to measurable successes for the first time.

Dr. Andreas Bastin, Chief Executive Officer

Nevertheless, we will not slacken the pace of our efforts. Because, even if our high tech hose and connector systems, made or designed in Germany, are widely accepted all over the world, we still have a long way to go to become global market leader in our specialist markets. We have already paved the way when it comes to implementing our internationalisation strategy, particularly with regard to building up our sales teams. And this proactive stance will gradually pay off with increasing sales. These up-front costs of internationalisation are nevertheless essential in order to be successful in the long term.

Somewhere else we will not hold back is in our innovation strategy. Our engineers, technicians and machine operators are continuously engaged in trying out new material variants when manufacturing or in the field of application of our products. The PA DUOPART® product innovation from the Novoplast Schlauchtechnik brand which was introduced onto the market in spring is one such case. Following a customer request – "Can you solve this

problem? – our technicians from Halberstadt worked meticulously until they were able to make a partially welded PA compressed air hose. The hose has been very well received by customers. And this year, it doesn't just end there with the PA DUOPART®: currently, some additional innovations from the Masterflex Group are about to be launched on the market. We are waiting to see what it is in store with eager anticipation!

To put things into perspective, both pillars of our growth strategy are equally important: internationalisation helps us leave our historically rooted central focus on Germany behind us and it's only through product innovations that we can maintain ourselves at the top of the value pyramid – a position which is also exciting for the shareholders. We are happy to answer any questions if you would like to know any more about our innovations. Look forward to hearing from you!

Gelsenkirchen, 29 July 2013

Dr. Andreas Bastin Chief Executive Officer

Ihr Idubeas Jastin

Interim Management Report

Group structure and business activities

The Masterflex Group, with its parent company Masterflex SE, Gelsenkirchen (referred to below as Masterflex Group or Masterflex), is a supplier of high tech hoses and connector systems. The internationally operating group company with German roots is a specialist in the development and manufacture of high-quality connector systems made from high tech plastics and fabrics.

The main production sites of the international Masterflex Group and its 13 operating subsidiaries are Gelsenkirchen, Halberstadt, Norderstedt and Houston (USA). In addition, Masterflex has different locations in Europe, America and Asia through our subsidiary branches or sales partners.

Masterflex shares have been listed on the Frankfurt stock exchange since 2000.

Market and Competition

The global market for high tech hoses and connector systems comprises many predominantly regionally-oriented specialist markets which are mostly served by SMEs. Customers come primarily from the manufacturing sector including industrial applications (B2B market). Nevertheless, due to the scarcity of expertise in production, processing and application of the demanding polymers and many diverse fields of use, it is an attractive and profitable market.

For the first half of 2013, our markets have been characterised by a regionally very different dynamic. Whilst the economy in Europe and even in Germany continues to suffer from the effects of the European sovereign debt crisis, the comparatively high pace of growth continues in Asia and America, even though growth in Asia is not expected to be quite as high as at the beginning of the year. Masterflex responded to this continental divergence some time ago with its internationalisation strategy to spread the traditional sales focus of the European market to several regions of the world in the future.

Business development in the first half of 2013

2013 has seen significant progress after a not-too-easy start. In the second quarter of 2013, revenue increased by 6.4 percent on last year. This is all the more gratifying as the first quarter was still under the effect of slightly declining revenues. Thus, revenues increased by 2.5 percent in total over the first six months. This now confirms that the development at the start of the year was only a temporary event caused, in particular, by the low number of working days and lack of significant development in our market for high tech connector systems.

This also shows that our approach of a multi-branch strategy with a broad client base is right. At its inception decades ago, Masterflex was very much focussed on a small number of sectors, yet today our customers come from a variety of industries and particularly from growth areas.

Since March 2013 we have had, for the first time, a global uniform brand identity. The umbrella brand name of the company – Masterflex Group – now encompasses the sale of all our products worldwide under the brands Masterflex, Matzen & Timm, Novoplast Schlauchtechnik, Fleima-Plastic and Masterduct. The slogan Connecting Values expresses our performance promise in brief and succinct form: we offer more than hoses, namely competent advice with universal solutions from the technology leader.

To coincide with the new brand identity, our online presence has also been comprehensively redesigned. The Masterflex Group and all its products and locations can be found at www.MasterflexGroup.com. The websites for our products and brands will now be successively revised. For a short time you have already been able to find all the Masterflex brand products on our newly designed website www.masterflex.de which has updated content and layout.

In the second quarter, we were able to sign and implement a syndicated loan agreement. This new loan has a maturity of five years and completely replaces the old agreement. These four institutes now form a well-balanced number of banking partners, which secure the credit financing for our business needs; in addition, the State guarantee was able to be returned.

Internationalisation

Since the beginning of 2013, we have been recording substantial business at our new location in Kunshan in Shanghai, China. Healthy demand for "Made or Designed in Germany" high tech hoses is originating both from international customers as well as from local companies. This also applies to our site in Singapore which is successfully driving forward the expansion of our dealer network in other Asian regions. In the United States of America too, our intensified sales activities exhibit noticeable growth. Our internationalisation strategy clearly demonstrates measurable successes for the first time.

Innovation

In spring, we launched the new PA DUOPART® product under our Novoplast Schlauchtechnik brand. This innovation is particularly significant for pneumatic applications.

Up to now, it has only been technically possible to weld two polyamide (PA) hoses together over their entire length. To attach the pair (or trio) of hoses to individual couplings, the weld had to be partially cut open again. This resulted in the formation of burr which made a really air-tight seal to the coupling virtually impossible such as that required for pneumatic applications.

Thanks to an innovative manufacturing process, it is now possible to produce PA hoses with non-welded sections on a routine basis. An additional advantage of the technique is that complex bundling of individual hoses by hand is eliminated completely. Thus our new PA DUOPART® is the optimal solution for use with externally sealed couplings in pneumatic and hydraulic applications.

The new PA DUOPART® hose by NOVOPLAST, made from polyamide. The regularly recurring welded and non-welded sections mean it is of particular significance in pneumatic applications.

10 Interim Management Report

Further innovative connecting products are currently being developed. Our next product innovation will be launched In the autumn.

Results of operations, nets assets and financial position

Results of operations

Consolidated revenue has grown in the first half of 2013 against the same period of the previous year by 2.5 percent to \leqslant 29.0 million. In the second quarter of 2013 alone, revenue grew by 6.4 percent to \leqslant 14.6 million.

At \leqslant 29.5 million, gross revenue was 2.6 percent above that of the previous year (\leqslant 28.8 million). This slightly disproportionate increase is due to a build-up of stock.

Consolidated net profit before interest, taxes, depreciation and amortisation (EBITDA) fell from € 5.3 million to € 4.6 million (-13.7 percent) compared to the same period of the previous year. This is principally attributable to the start-up costs of internationalisation which unlike investments in property, plant and equipment at new sites is entered completely negative in the budget in terms of staff costs. An additional factor is rising staff costs within the annual wage and salary increases (inflationary effect). Totally, the staff costs amount to € 11.0 million (2012: € 9.9 million). The staff cost ratio (ratio of staff costs to revenue plus the changes in inventories) thus increased to 37.7 percent (previous year 34.7 percent). The cost of materials fell slightly from € 8.9 million (previous year: € 9.0 million) which equates to a cost-of-material ratio (ratio of the cost of materials to revenue plus the change in inventories) of 30.6 percent (previous year 31.7 percent). Other operating expenses amounted to € 5.0 million; this equates to 9.0 percent more than the same period in the previous year (€ 4.6 million).

In the first six months, depreciation and amortisation on property, plant and equipment remained virtually unchanged on the previous year at € 1.3 million.

The operating result (EBIT) amounted to \leqslant 3.3 million. This is a decline of 17.7 percent against the same period of the previous year (\leqslant 4.0 million). Based on turnover, the EBIT margin stands at 11.4 percent. The slight decline of the

margin is planned to be a temporary occurrence due to our internationalisation strategy.

The financial result amounts to \in -0.9 million (previous year \in -0.7 million) The increase over the previous year is essentially due to one-off items: by returning the State guarantee, annual costs only had to be allocated in the first half year. Over the next few months, we expect a reduction in the interest charges and thus also in the financial result while EURIBOR interest rates remain low.

Consolidated net profit is \leqslant 1.5 million (same period in the previous year was \leqslant 1.9 million). This equates to earnings per share of \leqslant 0.17 compared with \leqslant 0.22 per share in the first half year of 2012.

Net assets

On the balance sheet date of 30 June 2013, total assets had increased by 4.7 percent from \leqslant 52.4 million to \leqslant 54.9 million.

Non-current assets amount decreased slightly by 1.3 percent to \leqslant 31.4 million from the end of 2012: \leqslant 31.8 million). This is primarily attributable to deferred tax assets of \leqslant 5.7 million, which fell by 3.7 percent due to the positive business results (end of 2012: \leqslant 5.9 million).

In contrast, current assets jumped 14.1 percent from $\[\in \]$ 20.6 million to $\[\in \]$ 23.5 million. On the one hand, this is due to an increase in receivables and other assets of +24.5 percent from $\[\in \]$ 6.3 million to $\[\in \]$ 7.8 million. This was largely due to trade receivables from ongoing business activities. On the other hand, current assets have risen primarily due to increased cash in hand and bank balances of $\[\in \]$ 4.0 million (+40.8 percent) owing to completion of the new syndicated loan in June.

Financial position

On 3 May 2013, Masterflex concluded a new syndicated loan agreement with four banks of up to € 40 million which runs until 2018. The first two tranches have replaced the current syndicated loan agreement which was running until 2015 as well as essentially all other credit lines in the Masterflex Group. The third tranche will be used to finance possible acquisitions into the core business. Covenants are agreed for the equity ratio, interest coverage and debt equity ratio. The State guarantee will be cancelled without being replaced. Disbursement of the syndicated loan took place in mid-June.

12 Interim Management Report

Equity has grown by 5.8 percent from € 20.5 million to the current figure of € 21.7 million due to the positive business results. The equity ratio is now 39.5 percent, while the capital ratio lies slightly under the first quarter figure predominantly due to the higher cash-in-hand amount and balance sheet increase associated with it.

Long term borrowings have increased by 10.5 percent to € 21.7 million. This figure reflects the new syndicated loan in which in particular all bank liabilities of the Group are now pooled into a long term amortisable loan.

In turn, short term financial liabilities fell 27.3 percent from \in 6.1 million to \in 4.4 million. Provisions amounted to \in 2.3 million at the balance sheet date (2012 year end: \in 2.6 million).

Staff report

As part of its growth strategy, the Masterflex Group has created a range of new jobs. In the first half of 2013, the number of employees employed in the Masterflex Group averaged 525. This corresponds to an increase of 8.2 percent compared to the same period of 2012. Almost all sites have invested in new staff. This primarily involved sales within the framework of the internationalisation strategy as well as production-related expansion.

Research and development

In spring, we launched the new PA DUOPART® product under the Novoplast Schlauchtechnik brand. This innovation is particularly significant for pneumatic applications.

Other R&D projects are being developed. As of 30 June 2013, there were no material changes compared with the statements included in the 2012 consolidated management report.

Report on post balance sheet date events

No events of particular significance relating to the results of operations, net assets and financial position took place after the balance sheet date.

Opportunities and risks report

There have been no changes to the opportunities and risk situation as presented in the 2012 consolidated report.

Outlook

Economic development remains ambivalent. Even if the German economy is still more stable than most other significant countries in the Euro zone, here as well there are first signs of a slowdown. In the other regions of the world where Masterflex is increasingly active, the signals indicate a clear tendency towards additional and more significant economic growth. This applies in particular to Asia as well as America.

The Masterflex Group continues to implement its long-term growth strategy in a consistent manner, which is based on continued internationalisation of the business, on innovation and on a series of internal measures for optimising the business model. This includes consistently implementing our unified brand identity, increased benchmarking for Group-wide implementation of success strategies as well as systematically optimising and unifying various internal processes and structures.

For 2013, we expect a significant increase in revenue, above that of 2012, depending on the progress made in implementing our internationalisation measures. Our operating result will follow the sales growth at a more moderate pace: given the start-up costs for further internationalisation, which in the main were recorded immediately in the financial statements, we nevertheless expect a clear two-digit EBIT margin for 2013.

The Masterflex Share

Based on the daily closing prices, the Masterflex share price has moved mainly sideways since the start of the year until the beginning of May 2013 with prices ranging from € 4.95 to 5.10. Then from mid-May, subsequent to publication of the first quarter results, the share price began to climb and at times experienced some lively trading. At the end of June, following the well-attended AGM on 11 June, the share price rose to well over € 5.50 accompanied also by comparatively lively trading.

In the first half of 2013, the share price fluctuated between an all-time low of \leqslant 4.85 (22 March 2013) and up to a high of \leqslant 5.69 (27 June 2013).

Liquidity of the shares has increased over the course of 2013. Over 977,000 shares have been traded on Xetra and on the floor following a quiet start in the second quarter. This averages around 7,818 shares per trading day. Even if trade has revived somewhat compared to the start of the year, the liquidity has not yet fully recovered to that of the first half of 2012 (10,660 per trading day). We hope to see an imminent revival in trade by expanding the circle of stock managers: since April, WGZ Bank has assumed in addition the function of Designated Sponsor alongside Close Brother Seydler Bank AG.

In May, Masterflex took part in the Spring conference of the German Stock Exchange in Frankfurt. At our very well attended presentation, there was a lively discussion about the characteristics of the market for high tech hoses and our future opportunities.

The annual general meeting (AGM) took place on 11 June 2013 at the traditional site of Schloss Horst in Gelsenkirchen. Around 43 percent of the share capital was represented. By a large majority, the shareholders agreed to the measures suggested by the management. The results and some images from the AGM can be found at www.MasterflexGroup.com/ Investor-relations/Hauptversammlung. A profit-transfer agreement with our subsidiary FLEIMA-PLASTIC GmbH, in Wald-Michelbach, was amongst the resolutions passed in the AGM thus optimising the tax burden of the Masterflex Group.

In June 2013, BBC GmbH informed us that they had exceeded the voting rights limit of five percent in the company and now have a share portfolio of 6.15 percent of Masterflex SE share capital. The shareholders of BBC GmbH are the two Executive Board members of Masterflex SE.

Notes to the Interim Report (1st half year 2013)

1. Reporting principles

This interim report was prepared in accordance with the International Financial Reporting Standards (IFRS), as applicable in the EU, and International Accounting Standards (IAS) of the International Accounting Standard Board (IASB) and is in keeping with the company's key accounting principles presented here. The same accounting principles were applied as in the consolidated financial statements for the financial year that ended on 31 December 2012.

2. Basis of consolidation

The basis of consolidation has not changed in comparison with 31 December 2012.

3. Dividend

Masterflex SE did not pay a dividend for the financial year 2012.

4. Financial liabilities

The syndicated loan agreement, which was concluded in June has a total volume of € 40 million and a maturity date of May 2018. The drawdown of the loan amounted to € 24.0 million on the balance sheet date.

The syndicated loan agreement was reduced in the balance sheet by the directly attributable transaction costs of € 727 thousand at initial recognition. The subsequent measurement is carried out at amortised cost according to the effective interest rate method. The difference between the disbursed amount (after deduction of transaction costs) and the redemption amount is distributed over the term at a rate consistent with the effective interest rate and recorded under net interest income.

The receivables from the bank consortium from the syndicated loan agreement are secured by the Masterflex Group companies among others by land debts registered on domestic real estate, the pledging of shares, the assignment of receivables and the transfers of ownership.

5. Segment reporting

The Masterflex Group divides up its operating segments in accordance with the criteria of IFRS 8. Control is carried out on the basis of the information that the management as chief operating decision maker receives for measuring the performance of and allocating resources for the entire Masterflex Group (management approach).

The basis of segmentation has not changed in comparison with the consolidated financial statements of 31 December 2012. SURPRO Verwaltungsgesellschaft mbH, Masterflex Entwicklungs GmbH and Masterflex Vertriebs GmbH are presented on a uniform basis under "Discontinued business units". The Masterflex Group thus has one operating segment, the core High tech hose systems business unit (HTS).

Segment reporting	High tech hose sytems	Con- tinued opera- tions	Discon- tinued opera- tions	Total seg- ments
30. June 2013	k€	k€	k€	k€

Revenue from non-Group third parties	28,261	28,261	0	28,261
Earnings (EBIT)	4,013	4,013	121	4,134
Investments in property, plant and equipment and intangible assets	978	978	0	978
Depreciations	1,282	1,282	0	1,282
Assets	51,245	51,245	19	51,264

6. Earnings per share

Basic earnings per share is calculated in accordance with IAS 33 by dividing consolidated net income by the weighted average of the number of shares in circulation during reporting period. As at 30 June 2013, basic earnings per share from continued operations amounted to \bigcirc 0.17 and earnings per share from continued and discontinued operations amounted also to \bigcirc 0.17; both figures are based on a weighted average number of shares of 8,865,874.

Since there is no stock option plan, diluted earnings are not calculated.

7. Treasury shares

As at 30 June 2013 Masterflex SE held a total of 134,126 treasury shares.

8. Employees

In the reporting period, the number of employees was 525, up 8.2 percent on the previous year period (485 employees).

9. Income tax

In the calculation of income tax expense in the interim financial report for the first half year, the estimated effective income tax rate for the current financial year is included in the intra-vear calculation of tax expense. The effective tax rate is based on current earnings and tax planning.

10. Cash flow statement

The consolidated cash flow statement is prepared in accordance with IAS 7 ("Cash Flow Statements"). A distinction is made between cash flows from operating, investing and financing activities. The cash and cash equivalents reported in the cash flow statement correspond to the "cash in hand and bank balances" reported on the face of the balance sheet.

The cash and cash equivalents at the end of the period, as presented in the consolidated cash flow statement, can be reconciled to the associated items in the consolidated balance sheet as follows:

	30. June 2013 k€	30. June 2012 k€
Cash and cash equivalents at the end of period	3,985	2,850
Cash in hand and bank balances included in assets held for sale	9	15
Cash in hand and bank balances	3,976	2,835

11. Related party disclosures

Masterflex SE and the companies included in the consolidated financial statements conducted material transactions with the following related parties within the meaning of IAS 24:

MODICA Grundstücks-Vermietungsgesellschaft mbH & Co., Objekt Masterflex KG, Gelsenkirchen.

The relationships are explained in the Notes to the Consolidated Financial Statements under note 35 in the 2012 Annual report. There have been no changes to the comments made there in the reporting period.

12. Auditor's review of the interim financial report

The interim financial statements and the interim management report of the first half year financial report were neither audited in accordance with section 317 of the German Commercial Code nor reviewed by an auditor.

13. Responsibility statement

To the best of our knowledge, and in accordance with the applicable reporting principles for interim reporting, the interim consolidated financial statements give a true and fair view of the assets, liabilities, financial position and profit or loss of the Group, and the interim management report of the Group includes a fair review of the development and performance of the business and the position of the Group, together with a description of the principal opportunities and risks associated with the expected development of the Group over the rest of the financial year.
